Web Programmer

This excellent opportunity is for a full time position at Mainstream Engineering Corp in Rockledge, FL. The primary function of the Web Programmer is to design, develop and maintain e-commerce websites and internal applications. Due to tremendous growth of our web based products and services we have created a new position to enhance the usability and functionality of existing sites and to develop new products. This position will focus on, but not be limited to web programming so proficiency in C, C++, or Java is required. Applicants must be able to work independently and as a member of a small team.

Mainstream Engineering Corporation is a solutions-oriented research, development and manufacturing small business founded in 1986. Mainstream began as a research and development company dedicated to solving NASA and DOD problems. Today, we perform R&D projects for virtually all agencies of the U.S. government and our products are sold in commercial, government, and military markets.

Responsibilities:

- Design, develop, and maintain internet e-commerce and intranet websites
- Develop and integrate internal/external software systems to streamline data and work flow
- Prepare and maintain technical documentation for your projects

Qualities possessed by the ideal candidate:

- Able to define and resolve programming problems
- Highly motivated, detail oriented, and well organized
- Excellent written communication skills

Qualifications:

- B.S. in Computer Science, Information Technology, or Related Field
- US Citizenship Required

Required Experience:

- Must be proficient in Java, C++, or C (2+ years)
- HTML, CSS, JavaScript, and SQL
- Linux, Unix, or Solaris

Preferred Experience:

JSP, .NET, Web Services, ASP, PHP, XML, Apache/Tomcat, e-commerce applications, Flash/ActionScript, AJAX, Silverlight, Dreamweaver, Embedded systems (AVR / Freescale) programming
