

## Employment Opportunity

### ***Position: Software Developer***

Orlando Software Group is seeking a **computer scientist** or **information technology professional** for a full time software development and support position. Primary duties will be software support of an expert system for engineering diagnostics working directly with end-users. C++ programming proficiency is required. Knowledge of Borland C++ Builder, Java and Linux are preferred. Candidates should have 3 to 5 years of overall programming experience and the ability to work independently with minimal direction.

Orlando Software Group, Inc. was founded in 1996 and specializes in development of software tools for business process analysis and improvement. Health insurance provided.

Qualified candidates should apply via email to: [jobs@osgi.com](mailto:jobs@osgi.com).
