Homework 0: Gathering Context Information

See Webcourses2 and the syllabus for due dates.

This homework is intended to fulfill UCF's requirement for some interaction from you during the first week of class and also to help us know more about your background in programming languages.

General Directions

This homework must be done either individually.

Answers to English questions should be in your own words; don't just quote from articles or books.

What to turn in

For problems that require an English answer, upload your answer to Webcourses2 for the assignment corresponding to that problem as a text file or a PDF file.

Problems

1. (5 points) Give a ranked list of the programming languages you most like to program in and are familar with, with item 1 being the language you like the best.

2. (5 points) What programming langauges or techniques would you like to learn about this semester?

Points

This homework's total points: 10.
